Trusting in the Future

Camphill: 70 Years

We would like to invite you to a Festival of encounter and would like to celebrate together with you. We would like to occupy ourselves with some questions which are perhaps not easy to answer: Do we have enough time for Spirituality? Does the model with house parents still have a future in our communities?

The impressions from the last conferences in Brachenreuthe, Dornach and Hermannsberg can

Trust

help inspire us to look courageously into the future. What effect do the images which we carry in us in the here and now (or the ones that we consciously create) have on our environment right down to the material life?

Such questions need a regular intercourse amongst ourselves and can lead us to common perceptions and also to posing new questions. We are excited and invite you warmly to this exchange.

So, see you on April 22nd in Hauteroda!
